## PROFILE

Seventh-semester Computer Science & Engineering student graduating in May 2027, with hands-on experience building Python ML pipelines, REST APIs, and web applications. Seeking software development, machine learning, and data analytics internships and 2027 graduate roles.

## EDUCATION

**B.E., Computer Science & Engineering** | Government Engineering College, Patan

Gujarat Technological University | Currently Semester 7 | Expected May 2027

CGPA: 8.37/10 (through Semester 6)

## EXPERIENCE

### Junior Data Analytics Intern | HN Techno | 03-17 July 2026

- Built data pipelines for ingestion, cleaning, IQR outlier handling, encoding, and feature scaling.
- Trained and evaluated Linear Regression using MAE, MSE, RMSE, and R2; developed FastAPI REST endpoints with JWT authentication and role-based access, plus interactive analytics dashboards.

## SELECTED PROJECTS

### MediInsurance | Python, FastAPI, React, Scikit-learn, SQLite [\[Source\]](#)

- Connected a medical-insurance regression pipeline to an authenticated API, prediction history, and Recharts dashboard.
- Implemented preprocessing and joblib persistence. Recorded R2: 0.8211; repository-reported result with preprocessing before the train/test split, requiring leakage-safe revalidation.

### ImgEnhancement | Python, OpenCV, Scikit-image, Flask, React [\[Source\]](#)

- Compared 14 classical and hybrid enhancement methods using entropy, PSNR, SSIM, and contrast.
- Exported ranked outputs and comparison tables for two sample images; combined normalized metrics with fixed or adaptive weights. Public implementation uses classical methods.

### My Insta | Node.js, Express, JavaScript, JWT, Multer [\[Source\]](#)

- Built authentication, image uploads, feeds, profiles, likes, comments, follows, and saved posts.
- Implemented 24-hour story expiry and JSON-file persistence across seven collections.

### Hostel Management System | Java Servlets, JDBC, MySQL, Maven [\[Source\]](#)

- Built administrator login and student add, view, delete, and semester-update workflows; persisted room and student records through JDBC and packaged the web application as a Maven WAR.

### The Wizarding Hub | JavaScript, Firebase, HTML, CSS [\[Source\]](#)

- Built blog, video, meme, live-chat, and admin interfaces with Firebase integration; added theme switching, canvas effects, and audio controls. [Live website](#).

## TECHNICAL SKILLS

**Languages:** Python, Java, JavaScript, TypeScript, SQL, PHP

**Data & ML:** Pandas, NumPy, Scikit-learn, Linear Regression, OpenCV, Scikit-image, Matplotlib

**Web & data:** React, Next.js, FastAPI, Express, JDBC, SQLAlchemy, MySQL, SQLite, Firebase

**Tools:** Git, GitHub, Vite, Maven, Netlify

## TRAINING & LANGUAGES

Geodata Processing using Python and Machine Learning - ISRO/IIRS, 2026 (A+)

Green Skills and Artificial Intelligence - AICTE & Shell India, 2025

Languages: English, Hindi, Gujarati
